# SUBJECT INDEX

- Acid production by *Streptococcus lactis*, 418  
 Acid production in milk, 20  
 Acids, *see* Amino, Gibberellic, Hydroxy, Keto, Lactic, Oxalic, Salicylic, Sorbic, Succinic  
 Actinomycetes, aerobic, selective isolation of, 75  
 Aerobic actinomycetes, selective isolation of, 75  
 Aerosols, average particle size of, 188  
 Agar, influence on streptomycetes, 493  
*Agaricus campestris*, oxalic acid production by, 255  
 Air filters, procedure for testing, 394  
 Algae, oxygen production by, 446, 450  
 Algae, toxicity of copper for, 345  
 Amino acids, of mushroom protein, 184  
 Ammonium salts, effect on paraformaldehyde solutions, 357  
 Animals, wild, enterococci in, 136  
 Antartica, soil microorganisms of, 116  
 Antibiotics, cephalothin, in vitro studies of, 122  
 Antifungal activity of poly-chlorinated pyrimidines, 78  
 Antifungal activity of sorbic hydroxamic acid, 362  
 Antifungal activity of violet-pigmented pseudomonads, 533  
 Antigen, protective, of *Bacillus anthracis*, 330  
 Antimicrobial activity of synthetic steroids, 542  
 Antiviral compounds, activity of, 310  
*Arthrobacter*, new bacterial polysaccharide from, 488  
*Aspergillus niger* cellulase, enzymes from, 315, 320  
*Aspergillus ochraceus*, hydroxylation of progesterone by conidia of, 50  
 Asphalt, microbial degradation of, 235  
  
*Bacillus anthracis*, protective antigen of, 330  
*Bacillus stearothermophilus* spores, effect of heat on, 100  
*Bacillus stearothermophilus* spores, germination of, 453  
*Bacillus subtilis*, resistance when irradiated, 216  
 Bacteria, distribution in healthy tomatoes, 7  
 Bacteria, effect of sodium hexametaphosphate on, 430  
 Bacteria, nonsporeforming, radiation resistance of, 398  
 Bacteria, preservation of, 244  
 Bacteria, psychrophilic, catalase activity of, 151  
 Bacteria, psychrophilic, effect of pasteurization on, 90  
 Bacteria, repression of *Staphylococcus aureus* by, 11  
 Bacteria, survival in lyophilized plasma, 30  
 Bacterial content of sheep and cow rumen, 190  
 Bacterial cultures, extracellular accumulation of pyrroles in, 145  
 Bacterial utilization of dodecyl sulfate, 339  
 Bacterial vaccine, multidose tablet form, 423  
 Bactericidal spray, effect against *Staphylococcus aureus*, 239  
 Bacteriology of manganese nodules, 15  
 Bacteriophage of *Staphylococcus aureus*, physiology of, 36  
 Basidiomycetes, action on progesterone, 256  
 Benzylpenicillin acylase, activity of, 1  
 Bioassay, gradient plate, for tyrothricin, 539  
 Bisulfite-brined cherries, softening of, by fungi, 93  
*Blakeslea trispora*, stimulation of carotenogenesis in by citrus products, 128  
*Blastomyces dermatitidis*, effect of fungicides on, 436  
 Bovine rumen, bacterial content of, 190  
 Bovine rumen, succinic acid activity in, 132  
  
 Carbohydrates, effect on germination of *Bacillus stearothermophilus* spores, 453  
 $\beta$ -Carotene synthesis, enhancement by citrus products, 128  
 Catalase activity of psychrophilic bacteria, 151  
 Cell counts, plant-infection technique for, 377  
 Cell disintegrator, 33  
  
 Cephalosporin C, nonbiological conversion of, 58  
*Cephalosporium*, enzyme production by, 111  
 Cephalothin, in vitro activities of, 122  
 Cherries, softening of, by fungi, 93  
*Chorella pyrenoidosa*, growth in recycled medium, 427  
*Chlorella pyrenoidosa*, oxygen production by, 446  
 2-Chloro-4-phenylphenol germicidal spray, evaluation of, 239  
 Chlortetracycline, resistance of salmonellae to, 368  
*Chromobacterium violaceum*, extracellular pyrroles in, 145  
 Citrus products, enhancement of  $\beta$ -carotene synthesis by, 128  
*Clostridium perfringens*, incidence in foods, 42  
*Coccidioides immitis*, effect of fungicides on, 436  
 Coliforms, oxytetracycline-resistant, in poultry products, 481  
 Coliforms, presence in pecan nut meats, 268  
 Color wheels for streptomycete taxonomy, 335  
 Concentrated culture, of microorganisms, 506  
 Contagion masks, evaluation of, 66  
 Continuous culture, maintenance of rumen bacteria in, 196  
 Continuous-flow mechanical cell disintegrator, 33  
 Copper, algicidal properties of, 345  
 Copper, algistatic properties of, 345  
 Copper chelates, mechanism of action of, 62  
*Cryptococcus neoformans*, effect of fungicides on, 436  
  
 Dairy products, identification of organisms producing "malty" defect in, 171  
 Dairy products, thermal resistance of staphylococci in, 45  
 Dentrifrices, application of gradient plate bioassay to, 539  
 Dialdehyde solutions, as sporicidal agents, 384  
 Dialysis fermentor for culture of microorganisms, 506  
 Disinfecting agents, sporicidal activity of, 384  
 Disinfection, of aerosolized pathogenic fungi, 436  
 Dodecyl sulfate, bacterial utilization of, 339  
  
 Enterococci, occurrence in wild animals, 136  
 Enterococci, occurrence in wild plants, 141  
 Enterococci, presence in pecan nut meats, 268  
 Enterotoxin B, assay with free-living nematodes, 365  
*Entodinium simplex*, lipids and free fatty acid contents of, 260  
 Environment, effect on inhibition of *Staphylococcus aureus*, 11  
 Environment, effect on phase of adjustment of *Pseudomonas fragi*, 179  
 Environment, wild, enterococci in, 136, 141  
 Enzyme activity of psychrophilic bacteria, 151  
 Enzymes from *Aspergillus niger* cellulase, 315  
 Enzymes from *Aspergillus niger*, fractionation of, 320  
 Enzymes, pectolytic, production by *Rhizopus stolonifer* sporangiospores, 463  
 Enzymes, production by *Cephalosporium*, 111  
 Enzymes, release with Servall cell fractionator, 467  
*Escherichia coli*, effectiveness of air filters against, 394  
*Escherichia coli*, multicomponent substrate utilization by, 157  
*Escherichia coli*, release of enzymes from, 467  
 Exhaust systems, efficiency of air filters in, 394  
  
 Fatty acids, oxidation by *Penicillium roqueforti* spores, 166  
 Fatty acids, uptake by *Entodinium simplex*, 260  
 Fatty acids, uptake by *Isotricha intestinalis*, 260  
 Fermentation process review, 273  
 Fermentor, dialysis, for culture of microorganisms, 506  
 Filters, air, procedure for testing, 394  
 Fish muscle, spoilage of, 458  
 Food bacteria, repression of *Staphylococcus aureus* by, 11, 163

- Food microorganisms, influence on *Staphylococcus aureus* growth, 513
- Foods, incidence of *Clostridium perfringens* in, 42
- Formaldehyde solutions, as sporicidal agents, 384
- Fractionator, Servall cell, release of enzymes with, 467
- Freeze-drying, effect on *Salmonella typhimurium*, 371
- Freeze-drying, use in preservation of bacteria, 224
- Freezing, effect on *Streptococcus lactis*, 326
- Frozen foods, fungi in, 352
- Fuels, hydrocarbon, viability of microorganisms in, 472
- Fungi, activity of chlorinated pyrimidines against, 78
- Fungi, aerosolized, disinfection of, 436
- Fungi, growth in sea water medium, 501
- Fungi in frozen food products, 352
- Fungi, softening of cherries by, 93
- Fungicides, determination of concentration and time for disinfection by, 436
- Fungicides, effect on tissue phase of organisms, 436
- Fungi, wood-rotting, oxalic production by, 249
- Gas exchange, with mass cultures of algae, 446, 450
- Gas exchanger, photosynthetic, reliability of, 450
- Gibberellic acid, microbiological production of, 523
- Glucose, effect on function of existing enzyme systems, 157
- Glucose media, effect of gibberellic acid production, 523
- $\beta$ -Glucosidases from *Aspergillus niger* cellulase, 315, 320
- Gnotobiotic silage, 529
- Goldfish, toxic effects of lysins on, 69
- Gradient plate technique, use in studying cephalothin, 122
- Heat activation, of bacterial spores, 485
- Heat, effect on *Bacillus stearothermophilus* spores, 100
- Heat treatment, effect on radiation resistance, 413
- Heat treatment, effect on *Staphylococcus aureus*, 404
- Hexametaphosphate, sodium, effect on bacteria, 430
- Histoplasma capsulatum*, effect of fungicides on, 436
- Hydrocarbon fuels, viability of microorganisms in, 472
- Hydroxy acids, conversion to optically active lactones, 389
- 3-Hydroxy-2-naphthoic acid, antimicrobial activity with 8-quinolinol, 62
- Insecticides, response of rumen bacteria and protozoa to, 517
- Interferon, activity of, 310
- Intracellular proteinase system of *Trichosporon*, 23
- Isoetria intestinalis*, lipids and free fatty acid contents of, 260
- Keto acids, conversion to optically active lactones, 389
- Lactic acid bacteria, growth in forage, 529
- Lactic streptococci, differentiation of, 171
- Lactobacilli, production of acid in milk by, 20
- Lactones, preparation by reduction of keto acids, 389
- Leaching of metallic sulfides by microorganisms, 105
- Lipids, in metabolism of rumen ciliates, 260
- Lyophilized plasma, survival of bacteria in, 30
- Lysins, staphylococcal, toxicity for goldfish, 69
- McMurdo Sound Area, Antarctica, soil microorganisms of, 116
- Manganese nodules, bacteriology of, 15
- Meats, enterotoxin production in, 498
- Meats, spoilage by radiation-resistant organisms, 398
- Meats, staphylococcal growth in, 498
- Medium for enumeration of sulfate-reducing bacteria, 265
- Metallic sulfides, leaching of, by microorganisms, 105
- Microbiological aerosols, average particle size of, 188
- Microbiological leaching of metallic sulfides, 105
- Micrococcus lysodeikticus*, viable-cell counts of, 305
- Micrococcus radiodurans*, radiation resistance of, 398, 413
- Microorganisms, effect of ultraviolet-absorbing compounds on, 154
- Microorganisms, viability in hydrocarbon fuels, 472
- Milk, acid production in, 20
- Mushroom protein, amino acids of, 184
- Nematodes, resistance to staphylococcal enterotoxin, 365
- Nodule enrichments, bacterial action on manganese in, 45
- Oxalic acid production by *Agaricus campestris*, 255
- Oxalic acid production by *Pleurotus ostreatus*, 249
- Oxygen production by algae, 446
- Oxygen production by algal gas exchanger, 450
- Oxytetracycline resistance, effect on acid production by *Streptococcus lactis*, 418
- Oxytetracycline-resistant coliforms, in poultry products, 481
- Paraformaldehyde, antibacterial activity of, 357
- Particle size of aerosols, 188
- Pasteurization, effect on psychrophilic bacteria, 90
- Pecan nut meats, contamination in commercial production, 268
- Pectolytic enzymes, production by *Rhizopus stolonifer* sporangiospores, 463
- Penicillium roqueforti* spores, oxidation of fatty acids by, 166
- Phage, see Bacteriophage
- Phase of adjustment of *Pseudomonas fragi*, 179
- Plant-infection technique for counting rhizobia, 377
- Plants, wild, enterococci on, 141
- Plasma, lyophilized, survival of bacteria in, 30
- Pleurotus*, amino acid composition of, 184
- Pleurotus ostreatus*, oxalic acid production by, 249
- Polysaccharide from *Arthrobacter*, 488
- Polysaccharide production by *Pullularia*, 211
- Poultry products, oxytetracycline-resistant coliforms in, 481
- Preservation of bacteria, 244
- Progesterone, hydroxylation by *Aspergillus ochraceus* conidia, 50
- Progesterone, transformations by Basidiomycetes, 256
- Proteinase system, intracellular, of *Trichosporon*, 23
- Protozoa, response to insecticides, 517
- Pseudomonads*, violet-pigmented, antifungal activity of, 533
- Pseudomonas*, asphalt degradation by, 235
- Pseudomonas fragi*, phase of adjustment of, 179
- Psychrophilic bacteria, catalase activity of, 151
- Psychrophilic bacteria, effect of pasteurization on, 90
- Pullularia*, polysaccharide production by, 211
- Pyrimidine, poly-chlorinated, antifungal activity of, 78
- Pyroles, extracellular accumulation in bacterial cultures, 145
- 8-Quinolinol, antimicrobial activity of, 62
- Radiation, effect on *Bacillus subtilis* spores, 216
- Radiation, effect on cold storage life of seafood, 220
- Radiation inactivation, influence of temperature on, 413
- Radiation-resistant organisms, inactivation of, 398, 413
- Recycled medium, effect on growth of *Chlorella pyrenoidosa*, 427
- Repression of *Staphylococcus aureus* by food bacteria, 163
- Respiratory protection of new contagion masks, 66
- Rhizobium trifoli*, counting populations of, 377
- Rhizopus stolonifer*, irradiated sporangiospores of, 463
- Rhizosphere, bean, pseudomonads from, 533
- Rumen bacteria, content in different sites in sheep and cows, 190
- Rumen bacteria, maintenance in continuous culture, 196
- Rumen bacteria, response to insecticides, 517
- Rumen bacteria, succinic acid turnover and propionate production in, 132
- Rumen ciliates, lipid metabolism of, 260
- Salicylic acid, antimicrobial activity with 8-quinolinol, 62
- Salmonella typhimurium*, preservation by freeze-drying, 371
- Salmonella typhimurium*, virulence for mice, 371
- Salmonellae, resistance to chlortetracycline, 368

*Sarcina lutea*, effect of sodium hexametaphosphate on, 430  
*Schizomycetes*, presence of benzylpenicillin acylase in, 1  
 Seafood, effect of radiation on cold storage life of, 220  
 Sea water, growth of fungi in, 501  
*Serratia*, presence in healthy tomatoes, 7  
 Sheep rumen, bacterial content of, 190  
 Silage, gnotobiotic, 529  
 Sodium chloride, effect on heat-shocked *Staphylococcus aureus*, 404  
 Sodium hexametaphosphate, effect on bacteria, 430  
 Sodium thiosulfate, conversion of cephalosporin C by, 58  
 Soil microorganisms of Antarctica, 116  
 Soil organisms, effect of ultrahigh vacuum on, 202  
 Sorbic hydroxamic acid, antifungal activity of, 362  
 Spoilage, of fish muscle, 458  
 Spoilage, radiation-resistant organisms in, 398  
 Sporangiospores, irradiated, of *Rhizopus stolonifer*, 463  
 Spore germination, effect of ultraviolet-absorbing compounds on, 154  
 Spores, bacterial, heat activation of, 485  
 Spores, bacterial, thermal death of, 485  
 Spores, effect of ultrahigh vacuum on, 202  
 Spores of *Bacillus stearothermophilus*, effect of carbohydrates on, 453  
 Spores of *Bacillus stearothermophilus*, effect of heat on, 100  
 Spores of *Bacillus subtilis*, resistance when irradiated, 216  
 Spores of *Penicillium roqueforti*, fatty acid oxidation by, 166  
 Spores, transformation of steroids by, 50  
 Sporocidal agents, dialdehyde solutions as, 384  
 Spot-plate technique for viable-cell counts, 305  
 Staphylococcal enterotoxin, resistance of nematodes to, 365  
 Staphylococcal lysins, toxicity for goldfish, 69  
 Staphylococci, enterotoxigenic, growth in meats, 498  
 Staphylococci, thermal resistance in dairy products, 45  
*Staphylococcus aureus*, effect of bactericidal spray on, 239  
*Staphylococcus aureus*, effect of sodium chloride on, 404  
*Staphylococcus aureus*, influence of food microorganisms on, 513  
*Staphylococcus aureus*, inhibition by paraformaldehyde, 357  
*Staphylococcus aureus*, physiology of phage of, 36  
*Staphylococcus aureus*, repression by food bacteria, 11, 163  
*Staphylococcus aureus*, resistance to heat treatment, 404

Sterilizing agents, sporicidal activity of, 384  
 Steroids, synthetic, antimicrobial activity of, 542  
 Steroids, transformation by spores, 50  
*Streptococcus lactis*, effect of freezing on, 326  
*Streptococcus lactis*, oxytetracycline-resistant, acid production by, 418  
*Streptococcus lactis* var. *maltigenes*, identification of, 171  
*Streptococcus pyogenes*, inhibition by cholestane, 542  
*Streptomyces griseus*, transfer and streptomycin production in, 28  
*Streptomyces griseus*, variants, characteristics of, 84  
 Streptomycete taxonomy, color wheels for, 335  
 Streptomycetes, influence of agar on, 493  
 Streptomycin production, effect of repeated transfer on, 28  
 Substrate utilization by natural bacterial populations, 157  
 Succinic acid activity in bovine rumen, 132  
 Sulfate-reducing bacteria, medium for, 265  
 Sulfides, leaching of, by microorganisms, 105  
 Surfactants, effect on antimicrobial activity of synthetic steroids, 542  
 Survival of heat-shocked *Staphylococcus aureus*, 404  
 Tablet form, of bacterial vaccine, 423  
 Thermal death of bacterial spores, 485  
 Thermal death rates of bacteria, 476  
 Thermal resistance of staphylococci in dairy products, 45  
*Thiobacillus ferrooxidans*, leaching of metallic sulfides by, 105  
 Tomatoes, healthy, bacteria in, 7  
*Trichosporon*, intracellular proteinase system of, 23  
 Tuberculin, stability of, 408  
 Typhoid vaccine, multidose tablet form, 423  
 Tyrothricin, gradient plate bioassay for, 539  
 Ultraviolet-absorbing compounds, effect on microorganisms, 154  
 Vaccine, bacterial, multidose tablet form, 423  
 Vacuum, ultrahigh, effect on spores and soil organisms, 202  
 Variants of *Streptomyces griseus*, characteristics of, 84  
 Wood-rotting fungus, oxalic acid production by, 249  
 Yeast, polysaccharide produced by, 211

INDEX TO DATE OF ISSUE
